Pathforge Fintech

Brand Voice & Content Guidebook

Version: 3.4 | **Effective date:** June 7, 2026

Document owner: Yuki Dubois, Director of Brand Strategy

Department: Creative Operations | **Contact:** yuki.dubois@pathforge.com

Industry: Fintech / Neobank | **Brand archetype:** Lover

1. About This Guidebook

Purpose. This guidebook defines how Pathforge Fintech sounds, what language is off-limits, how content must be formatted for each channel, and which legal disclosures are required before publishing. It applies to every employee, agency, freelancer, and AI tool producing customer-facing content on Pathforge Fintech’s behalf.

Mission. Our mission is to make personal finance feel approachable instead of intimidating for people opening their first account.

Who this is for: Marketing, Content, Social, Customer Support, Legal & Compliance review, and any external agency or contractor producing Pathforge Fintech content.

Scope: Applies to all channels – social, email, SMS, push, web, paid media, and customer support – across every market Pathforge Fintech operates in.

How to use this document: Sections 2-3 define *how we sound*. Sections 4-6 define *what’s off-limits and how content must be formatted*. Section 7 is a channel-by-channel playbook. Sections 8-9 cover legal disclosures and crisis protocol. Appendices A and B are a machine-readable rule set and worked examples, useful for training reviewers (human or automated) on real compliant vs. non-compliant content.

Revision History

Version	Date	Author	Summary of Changes
3.4	June 7, 2026	Yuki Dubois	Current version – full guidebook consolidation, added crisis protocol and regional disclosure appendix.
1.0	March 7, 2025	Maya Osei	Added channel-specific character limits and updated restricted word list.
0.1	November 3, 2024	Maya Osei	Initial draft circulated for stakeholder review.

2. Brand Foundations

Brand Story

Pathforge was founded after its co-founders watched their own parents get quoted three different answers for the same loan question. The company's first internal doc wasn't a business plan – it was a glossary translating bank jargon into plain English. That glossary became the seed of this guidebook.

Positioning Statement

For people opening their first real bank or investment account, Pathforge is the neobank that explains every fee and feature in plain language – unlike traditional banks that bury the details in a 40-page disclosure PDF.

Competitive Differentiation

Legacy banks lead with product features and bury the fine print. Pathforge leads with the fine print, in plain English, right where the decision is being made – then gets out of the way.

Audience Personas

Riley, 23 – First job out of college, first bank account outside a student account

- **Goals:** Understand what's normal to pay in fees and what isn't.
- **Frustrations:** Being upsold products she doesn't understand, hidden minimums.
- **Primary channels:** In-app, push, social (Instagram/TikTok)

The Osei family, small business owners – Running a two-person landscaping business

- **Goals:** Separate business and personal finances without hiring a bookkeeper.
- **Frustrations:** Business banking products written for enterprises, not solo operators.
- **Primary channels:** Email, web, phone support

3. Messaging Pillars & Tagline Library

Messaging Pillars

Fees in plain sight. Every fee is named, explained, and shown before the moment of commitment. > “\$0 monthly fee. \$3 for out-of-network ATMs, refunded up to 3x/month.”

No first-account shame. We never assume the reader already knows how banking works. > “New to investing? Here’s the 60-second version.”

Confidence through math, not hype. We show the actual number instead of a vague promise. > “That’s an extra \$340 a year, on average, for accounts like yours.”

Approved Tagline Variations

Context	Approved Line
Primary / brand	Pathforge. Made Simple.
App store listing	Banking that explains itself.
First-account onboarding email	Welcome to your first real bank account – let’s make it make sense.
Small business landing page	Business banking, without the business-school vocabulary.

Taglines must be reproduced verbatim for the context listed. Do not mix and match phrases between variants, and do not create new tagline variants without Brand Owner sign-off.

4. Brand Voice & Tone

Pathforge Fintech's voice is **reassuring, sophisticated, inclusive, playful**. These traits should be recognizable in every piece of content, regardless of channel or author.

Reassuring

Money is emotional. We lead with stability before we lead with features.

Do	Don't
"Your money is FDIC-insured and always accessible – here's how the fee works."	"Fee schedule: see Section 4.2."

Sophisticated

We respect the reader's intelligence; we simplify without dumbing down.

Do	Don't
"Compound interest means your interest also earns interest – here's your number."	"It's basically magic money math!"

Inclusive

We never assume prior financial knowledge or a specific financial background.

Do	Don't
"No credit history? You can still build one with us – here's how."	"Obviously you'll want to check your credit score first."

Playful (in restraint)

Light warmth in onboarding and app copy; never in anything involving money movement or risk.

Do	Don't
"Nice! Your first paycheck just landed." (in-app, low stakes)	"Oops! Your transfer might have failed, who knows!" (money-movement error)

Tone by Context

Context	Tone Adjustment
Marketing & social	Full voice expression – lead with personality within the pillars above.
Transactional (receipts, confirmations)	Warm but efficient; clarity outranks personality here.
Customer support (routine)	Calm, helpful, human – avoid scripted-sounding phrases.
Customer support (complaints or errors)	Extra empathy, zero humor, always a clear next step.
Legal, disclosures, and compliance copy	Neutral and precise; voice pillars do not override legal accuracy.

Before & After: Applying the Voice

Overdraft notice

Generic (off-brand)	Pathforge Fintech voice
Your account has incurred an overdraft fee as outlined in your account agreement.	Your account went to -\$12 today, so a \$0 fee applied (yep, \$0 – we don't charge overdraft fees). Here's what happened.

Investment account welcome

Generic (off-brand)	Pathforge Fintech voice
Your brokerage account has been successfully opened and is ready for use.	Your investing account is live. Before you make your first move, here's the 3-minute rundown on risk and fees.

Rate change notice

Generic (off-brand)	Pathforge Fintech voice
Please be advised that your interest rate is subject to change per the terms of your agreement.	Heads up: rates are adjusting next month. Here's your new number and what it means for your balance.

5. Restricted & Prohibited Language

The words and phrases below are banned in all Pathforge Fintech customer-facing content. If a word isn't listed here but feels like it violates the spirit of this list (hype, unsubstantiated claims, or off-tone language), escalate to Brand or Legal before publishing.

Restricted Term	Category	Why It's Restricted	Use Instead
guaranteed returns	Regulatory risk (SEC/FINRA)	No investment return can be guaranteed; this is a securities-law red line.	"historical average return of X% (past performance does not guarantee future results)"
no risk	Regulatory risk	All investment and most financial products carry some risk.	"lower-risk option," "FDIC-insured up to \$250,000"
get rich	Unsubstantiated / predatory framing	Implies unrealistic outcomes and can read as predatory marketing.	"grow your savings," "build long-term wealth"
revolutionary (overused)	Brand-tone / credibility risk	Overused superlative that reads as hype rather than substance.	"a simpler way to," "built differently"
miracle	Unsubstantiated claim	Financial products are not miraculous; this invites regulatory scrutiny.	"a smarter default," "an easier starting point"
beat the market	Regulatory risk (SEC/FINRA)	Implies guaranteed outperformance, a securities-marketing red line.	"track an index designed to," with historical data cited
insider tip	Regulatory / legal risk	Implies non-public information, which is both misleading and potentially illegal to imply.	"a strategy many investors use"
can't lose	Regulatory risk	All investing carries risk of loss; this phrase alone can trigger regulatory action.	"a lower-volatility option"
free money (re: bonuses/APY)	Misleading framing	Bonuses and APY have terms and are not literally free.	"\$50 bonus after your first deposit - terms apply"
passive income guaranteed	Regulatory risk	Combines two red-flag terms in one phrase.	"a way to put your savings to work"
debt-free fast	Unsubstantiated / predatory framing	Implies a universal timeline that doesn't exist.	"a plan to pay down debt faster", with a real example timeline
pre-approved (unless verified)	Legal / TILA risk	Only use if the specific offer meets legal pre-approval criteria.	"check your rate in 60 seconds, no credit impact"

General Principles (for anything not explicitly listed)

1. **No unsubstantiated superlatives** ("best," "#1," "revolutionary") without a citable source

on file with Legal.

2. **No absolute guarantees** of outcome, result, or performance – individual results vary and must be described that way.
3. **No manufactured urgency** (“only hours left,” “prices going up forever”) unless the constraint is real and verifiable.
4. **No borrowed authority** (implying a certification, endorsement, or approval that hasn’t been formally granted and documented).

6. Formatting Standards

Standard	Rule
Capitalization	Sentence case for headlines, buttons, and subject lines (capitalize only the first word and proper nouns). Do not use Title Case or ALL CAPS except for the brand wordmark itself.
Oxford comma	Always used in lists of three or more items: “colors, fonts, and tone” – not “colors, fonts and tone.”
Numbers	Spell out one through nine in body copy; use numerals for 10 and above, all statistics, and all measurements (e.g. “3 steps,” “nine reasons,” “24/7”).
Dates	Write dates as Month D, YYYY (e.g. “July 2, 2026”) in body copy; MM/DD/YYYY is permitted only in dense UI tables.
Emoji usage	Emoji are welcome in social and push copy (max 2 per post) to reinforce tone – never in formal emails, legal copy, or disclosures.
Hashtags	Maximum 3 hashtags per social post, placed at the end of the caption, never inline in a sentence. The branded hashtag comes first.
Links & CTAs	Buttons and links use an active verb + outcome (“Start your plan,” not “Click here” or “Learn more”). Never use a bare URL in body copy on channels that support link text.
Accessibility	Every image in customer-facing content must ship with descriptive alt text (not “image of...”); every video must include captions before publishing.
Acronyms	Spell out any acronym on first use per document/page, followed by the acronym in parentheses; the acronym alone may be used thereafter.
Contractions	Contractions are allowed and encouraged (“we’re,” “you’ll”) to keep the voice conversational, except inside formal disclosures and legal text.

Visual Identity Quick Reference

Element	Specification
Primary color	#0B132B
Secondary color	#5BC0BE
Accent color	#6FFFE9
Primary typeface	Clash Display (headlines/display)
Secondary typeface	Satoshi (body/UI copy)
Approved tagline	“Pathforge. Made Simple.” – reproduce verbatim, do not paraphrase

Localization Notes

- Translated content must be reviewed by a native-speaking editor, not machine-translated and published directly.
- Idioms and wordplay in the Clash Display-styled headline system rarely translate – prioritize meaning over literal wording when localizing.
- Currency, date, and measurement formats follow local convention (e.g. DD/MM/YYYY and metric units outside the US) even when the surrounding copy is in English for a US-based CMS.

7. Channel Playbook

Character limits are hard constraints (Section 6 covers the full table); this section covers *how* to use each channel well within those constraints.

Instagram

Lead visually; caption supports the image rather than repeating it. Best for brand-world content, product detail, and community-facing tone.

Example (on-brand): > Let's be honest — meet the Pathforge Fintech way to get more done with less hassle. Pathforge. Made Simple. #Pathforge

TikTok

Fastest-moving channel – voice can flex slightly more casual here than elsewhere, but restricted words and disclosures still apply in full.

Example (on-brand): > VOICEOVER: 'At Pathforge Fintech, we believe First-Time Buyers deserve better. That's why we help you get more done with less hassle.'

LinkedIn

Most formal social channel. Use for company milestones, hiring, thought leadership – tone shifts toward “sophisticated” and “reassuring” pillars over “witty” or “edgy” ones.

Example (on-brand): > (see brand voice section for tone reference)

Email

Highest-trust, most personal channel. Subject line earns the open; body copy earns the click. Disclosures are never optional here.

Example (on-brand): > Okay, this is exciting — how Pathforge Fintech helps you get more done with less hassle

SMS / Push

Shortest attention span, highest interruption cost. One idea per message, always.

Example (on-brand): > Let's be honest! Your Pathforge Fintech update is ready — a quick way to get more done with less hassle.

Blog / SEO

Longest-form brand voice expression. This is where a voice pillar can be explained, not just demonstrated.

Example (on-brand): > Pathforge. Made Simple. Pathforge Fintech exists so First-Time Buyers can get more done with less hassle — nothing more complicated than that.

Paid Search / Display

Least room for personality – clarity and compliance outrank cleverness. Every claim needs to survive legal review at 30 characters.

Example (on-brand): > Pathforge Fintech: Pathforge. Made Simple.

Customer Support

Voice pillars still apply, but empathy and clarity always outrank wit or edge, especially in complaints or errors.

Example (on-brand): > Thanks for reaching out! We hear you, and we're on it — Pathforge Fintech's here to make sure you get more done with less hassle. We'll follow up within one business day.

Channel-Specific Character Limits

Channel	Field	Character Limit	Notes
X / Twitter	Post text	280 characters	Leave room for a link (~23 chars) if sharing one.
Instagram	Caption	2,200 characters (aim for first 125 visible)	Front-load the hook; caption truncates after ~3 lines.
Instagram	Bio	150 characters	One line of value prop + one line of CTA max.
Facebook	Post text	63,206 characters (aim for under 80 for engagement)	Short posts consistently outperform long ones in feed.
LinkedIn	Post text	3,000 characters (aim for under 200 above the fold)	First 2-3 lines show before 'See more' – put the point there.
TikTok	Caption	2,200 characters (aim for under 150)	Hook must land in the first 3 words.
Email	Subject line	60 characters (front-load first 30 for mobile)	Avoid ALL CAPS and more than one exclamation point.
Email	Preview text	90 characters	Must not repeat the subject line verbatim.
SMS / Text	Message body	160 characters (single segment)	Longer messages split into multiple segments and may be billed/delivered separately.
Push Notification	Title	50 characters	Titles longer than this truncate on most Android/iOS lock screens.
Push Notification	Body	150 characters	Lead with the benefit, not the feature.
SEO / Meta	Meta description	155-160 characters	Google truncates beyond this; include the primary keyword early.
Paid Search	Headline (Google Ads)	30 characters per headline	Up to 3 headlines are combined; each must stand alone.
Blog / Web	Page title / H1	60 characters	Keep the brand name out of the title unless it's the subject.

8. Required Disclosures & Disclaimers

Pathforge Fintech operates in a category with specific disclosure obligations. The table below defines exactly when a disclosure is required, the approved wording, and where it must appear. Do not paraphrase disclosure text without Legal sign-off.

Content Scenario	Required Disclosure Text	Placement Rule
Any mention of investment growth, returns, or performance	"Past performance does not guarantee future results. All investing involves risk, including loss of principal."	Directly below the performance statement, not in a linked footnote only.
Any mention of FDIC/deposit insurance	"Deposits are FDIC-insured up to \$250,000 per depositor, per ownership category."	Same paragraph as the insurance claim.
Referral or affiliate promotions	"Pathforge may receive compensation for this referral. Terms and conditions apply; see website for full details."	Before the CTA button, visible without scrolling on mobile.
APR, interest rate, or fee mentions in ads	"Rates and terms subject to change; see current rates at pathforge.com/rates."	Immediately adjacent to the rate/fee figure.

General disclaimer (use when no scenario above applies but a claim is being made): >

"Past performance does not guarantee future results. All investing involves risk, including loss of principal."

Regional Disclosure Requirements

Region	Requirement
United States	Regulation E notice required for electronic transfers: "Your rights and liabilities are described in our Electronic Fund Transfer disclosure."
European Union	PSD2 notice required for payment services: "Payment services are provided in accordance with PSD2 and applicable EU consumer protection law."
United Kingdom	FCA notice required: "Pathforge UK is authorised and regulated by the Financial Conduct Authority."

9. Crisis & Sensitive-Topic Communication Protocol

Acknowledge fast. Publicly acknowledge any service disruption, error, or complaint pattern within 1 hour, even if the full fix isn't ready. Silence reads worse than an honest "we're on it."

Drop the personality, keep the humanity. Suspend Pathforge Fintech's lighter tone pillars (wit, edge, playfulness) during an active incident. Empathy and clarity remain non-negotiable.

One voice, one channel of record. Designate a single channel (usually the status page or a pinned post) as the source of truth; all other channels link back to it rather than repeating varying details.

No speculation. Never guess at root cause, timeline, or blame publicly. State only what is confirmed.

Close the loop. Once resolved, publish a plain-language summary of what happened and what changed – silence after resolution erodes trust as much as silence during the incident.

Legal & Compliance sign-off. Any incident involving data, safety, or regulated claims requires Compliance sign-off before any public statement, even a holding statement.

10. Glossary: Approved Terminology

Quick reference mapping restricted terms to their approved replacements. See Section 5 for the full rationale behind each restriction.

Instead of...	Use...
guaranteed returns	"historical average return of X% (past performance does not guarantee future results)"
no risk	"lower-risk option," "FDIC-insured up to \$250,000"
get rich	"grow your savings," "build long-term wealth"
revolutionary (overused)	"a simpler way to," "built differently"
miracle	"a smarter default," "an easier starting point"
beat the market	"track an index designed to," with historical data cited
insider tip	"a strategy many investors use"
can't lose	"a lower-volatility option"
free money (re: bonuses/APY)	"\$50 bonus after your first deposit – terms apply"
passive income guaranteed	"a way to put your savings to work"
debt-free fast	"a plan to pay down debt faster", with a real example timeline
pre-approved (unless verified)	"check your rate in 60 seconds, no credit impact"

Appendix A: Machine-Readable Rule Reference

The rules below are the atomic, structured version of Sections 4-8, formatted for ingestion by content-review tooling (human or AI). Each rule maps to a Rule ID for traceability.

Rule ID	Category	Rule Text
RL0337	Logo	The Pathforce Fintech logo must always maintain clear space equal to 2x the logo's negative-space padding on all sides; no text, imagery, or UI elements may intrude on this zone.
RL0338	Logo	Never display the Pathforce Fintech logo smaller than 20px digital / 0.4in print; below this size the wordmark becomes illegible.
RL0339	Color	#6FFFE9 is reserved for calls-to-action and small highlight moments — it must never be used as a large background field.
RL0340	Color	Never substitute unapproved colors for #0B132B, #5BC0BE, or #6FFFE9 in any customer-facing material.
RL0341	Typography	Headline text set in Clash Display must never fall below 18pt in digital contexts for accessibility.
RL0342	Typography	Never substitute a system font for Clash Display or Satoshi in customer-facing materials without design team sign-off.
RL0343	Voice & Tone	Pathforce Fintech's voice is reassuring, sophisticated, inclusive, playful. Copy that reads as the opposite of these traits (e.g. cold, generic, or overly formal where warmth is expected) is off-brand.
RL0344	Voice & Tone	Pathforce Fintech never talks down to First-Time Buyers; explain, don't lecture.
RL0345	Messaging	The approved Pathforce Fintech tagline is 'Pathforce. Made Simple.'. It must be reproduced verbatim — do not paraphrase, translate loosely, or alter punctuation in official materials.
RL0346	Messaging	Pathforce Fintech never disparages named competitors by name in public-facing content.
RL0347	Legal & Compliance	Content that makes claims requiring substantiation must include the disclaimer: 'Terms and

		conditions apply; see website for full details.'
RL0348	Imagery	Pathforge Fintech imagery style is: high-contrast studio shots on a solid brand-color background. Stock photography that contradicts this direction should be rejected in creative review.

Appendix B: Worked Examples - Compliant vs. Violation

Real examples of content evaluated against this guidebook, with the reasoning a reviewer (or an AI content-compliance tool) should apply.

Example 1 - Website Hero Copy - Compliant

Pathforge. Made Simple. Pathforge Fintech exists so First-Time Buyers can get more done with less hassle — nothing more complicated than that.

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0343)

Example 2 - Blog Intro - Compliant

If you've ever wished fintech felt less complicated, you're exactly who Pathforge Fintech was built for. Here's how we help you get more done with less hassle.

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0344)

Example 3 - Push Notification - Compliant

Let's be honest! Your Pathforge Fintech update is ready — a quick way to get more done with less hassle.

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0343)

Example 4 - Email Subject Line - Compliant

Okay, this is exciting — how Pathforge Fintech helps you get more done with less hassle

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0344)

Example 5 - Video Ad Script Line - Compliant

VOICEOVER: 'At Pathforge Fintech, we believe First-Time Buyers deserve better. That's why we help you get more done with less hassle.'

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0344)

rule: RL0344)

Example 6 - Customer Support Reply - Compliant

Thanks for reaching out! We hear you, and we're on it — Pathforge Fintech's here to make sure you get more done with less hassle. We'll follow up within one business day.

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0344)

Example 7 - Ad Headline - Compliant

Pathforge Fintech: Pathforge. Made Simple.

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0343)

Example 8 - Social Media Post - Compliant

*Let's be honest — meet the Pathforge Fintech way to get more done with less hassle.
Pathforge. Made Simple. #Pathforge*

Reasoning: Matches Pathforge Fintech's tone (reassuring, sophisticated, inclusive, playful), reflects the mission, and uses approved messaging elements (tagline/benefit language) correctly. (Related rule: RL0343)

Example 9 - Blog Intro - Violation (Tagline_Alteration, Medium severity)

Pathforge Fintech: Pathforge. Made Simple — every single time, guaranteed!

Reasoning: The approved tagline 'Pathforge. Made Simple.' has been altered with added words and punctuation. Taglines must be reproduced verbatim in official materials, not paraphrased or embellished. (Related rule: RL0345)

Example 10 - Customer Support Reply - Violation (Imagery_Mismatch, Low severity)

Ad creative note: stock photo shows a generic handshake in a beige boardroom, which contradicts Pathforge Fintech's defined imagery style (high-contrast studio shots on a solid brand-color background).

Reasoning: Pathforge Fintech's imagery guideline calls for 'high-contrast studio shots on a solid brand-color background'. Generic boardroom stock photography contradicts this direction and should be rejected in creative review. (Related rule: RL0348)

Example 11 - Email Subject Line - Violation (Tone_Mismatch, Medium severity)

NOTICE: Pathforge Fintech Product Update — Action Required

Reasoning: This copy reads cold, corporate, and generic — the opposite of Pathforge Fintech’s defined voice (reassuring, sophisticated, inclusive, playful). It could belong to any brand, which directly breaks the rule that copy should be recognizably Pathforge Fintech’s and reflect its tone attributes. (Related rule: RL0344)

Example 12 - Product Description - Violation (Color_Misuse, Medium severity)

Packaging proof: #0B132B appears only as a thin 4px border instead of anchoring the majority of the design.

Reasoning: Breaks Pathforge Fintech’s color rules: #0B132B must anchor at least 60% of any composition, and #6FFFE9 is reserved for small CTA moments, not large background fields. Introducing unapproved colors is also prohibited. (Related rule: RL0340)

Example 13 - Video Ad Script Line - Violation (Off_Mission_Messaging, High severity)

Pathforge Fintech is expanding into flash-sale daily deals with rotating discounts on unrelated third-party products.

Reasoning: This contradicts Pathforge Fintech’s stated mission (‘Our mission is to bring honesty and craftsmanship back to fintech.’) and its positioning as a Lover archetype brand. All messaging must tie back to the mission. (Related rule: RL0346)

Example 14 - Website Hero Copy - Violation (Font_Substitution, Low severity)

Email template note: headline set in Arial instead of Clash Display because ‘the designer was on PTO and needed a fast fallback’.

Reasoning: Violates the typography rule requiring Clash Display for headlines and Satoshi for body copy; system-font substitution requires design team sign-off, which wasn’t obtained. (Related rule: RL0342)

Example 15 - Ad Headline - Violation (Banned_Word_Usage, High severity)

Pathforge Fintech: The miracle option, miracle results.

Reasoning: Uses the banned word/phrase ‘miracle’, which is explicitly prohibited in Pathforge Fintech content due to overpromising or legal-risk connotations in the finance category. (Related rule: RL0347)

Example 16 - Press Release Snippet - Violation (Unsubstantiated_Claim, High severity)

Pathforge Fintech guarantees improved outcomes for every customer, no exceptions.

Reasoning: Makes a claim requiring substantiation without including the required disclaimer: ‘Terms and conditions apply; see website for full details.’. (Related rule: RL0347)

11. Review, Approval & Escalation

Role	Name	Responsibility	Contact
Brand Owner	Yuki Dubois	Final sign-off on voice/tone and visual identity questions	yuki.dubois@pathforge.com
Compliance Reviewer	Owen Okafor	Reviews all regulated-claim and disclosure content	owen.okafor@pathforge.com
Content Lead	Owen Petrov	First-line review for channel formatting and restricted words	owen.petrov@pathforge.com

Escalation path: Content Lead review → Compliance review (required for any claim, disclosure, or restricted-word edge case) → Brand Owner sign-off for anything setting new precedent.

Questions about this guidebook should go to yuki.dubois@pathforge.com. This document is reviewed quarterly; the next scheduled review is January 15, 2027.

Pathforge Fintech Brand Voice & Content Guidebook – Version 3.4 – June 7, 2026 – Internal & Agency Use Only – All brand names, people, and figures in this document are fictional and generated for demonstration/training purposes.
